OBJECTIVE

Computer Science undergraduate and Full Stack Developer interested in AI/ML, backend development, and healthcare technology, focused on building responsive web applications, database-driven systems, and AI-powered solutions for real-world problems.

TECHNICAL SKILLS

Languages: Java, Python, C#

Frameworks: .NET, ASP.NET Core, Flask

Core: Data Structures, Object-Oriented Programming

Database: MySQL

Tools: Git, GitHub, VS Code

EXPERIENCE

Full Stack Developer

SITER Academy (Remote)

2025 – Present

- Building practical full-stack projects under SITER Academy
- Working on frontend development, backend systems, databases, Git/GitHub, and project documentation
- Contributing to projects using .NET, Flask, and machine learning models

PROJECTS

OTMorph AI Suite: AI-Based Medical Image Registration

- Developed an unsupervised deep learning model to align CT and MRI images
- Applied Neural Optimal Transport with encoder-decoder architecture
- Evaluated alignment performance using Dice Similarity Coefficient (DSC $\approx$ 0.90)
- Developed Flask-based interface for image upload and visualization

ChatApp: Real-Time Chat Application

- Developed using C# and .NET with SignalR for real-time communication
- Implemented temporary chat rooms with automatic cleanup
- Added typing indicators and active user tracking

Student Performance Prediction

- Developed ML models using Linear Regression and Decision Tree
- Evaluated and compared model performance for prediction accuracy

COURSEWORK

Data Structures, Database Management Systems, Machine Learning Basics

CERTIFICATIONS

Smart India Hackathon 2023 (Participant)

Python – Cisco Networking Academy

DBMS: Hands-On Workshop – SITER Academy

EDUCATION

B.Tech in Computer Science Engineering

2023 – 2027

Kakatiya Institute of Technology and Science, Warangal

Intermediate

2021 – 2023

SR Kakatiya Junior College

High School

Spectra Global High School

LANGUAGES

English, Telugu, Hindi

Norwegian (A1 – actively learning)
